Blacksteel Energy Inc.
Notes to the Condensed Interim Financial Statements
For the three and six months ended October 31, 2019
(Amounts in Canadian dollars)
(Unaudited)

1. General business description

Blacksteel Energy Inc. ("**Blacksteel**" or the "**Corporation**") is engaged in the exploration for, development of and production of oil and natural gas. Blacksteel Energy Inc. is a publicly traded company, incorporated and domiciled in Canada. The address of business of the Corporation is 2204 6 AVE NW, Calgary, Alberta, Canada, T2N 0W9. These condensed interim financial statements were approved and authorized for issuance by the Board of Directors on December 30, 2019.

2. Basis of preparation

(a) Statement of compliance and going concern

These condensed interim financial statements present Blacksteel's financial position as at October 31, 2019, and April 30, 2019 and financial performance for the three and six month periods ended October 31, 2019 and 2018. They have been prepared in accordance with International Financial Reporting Standards ("**IFRS**") as issued by the International Accounting Standards Board ("**IASB**") and interpretations of the IFRS Interpretations Committee as applicable to interim financial statements including International Accounting Standards ("**IAS**") 34, Interim Financial Reporting.

The Corporation has working capital deficit at October 31, 2019 of \$1,789,016, and April 30, 2019 of \$1,594,397, and has incurred net losses and negative cash flow from operating activities for the period ended October 31, 2019, and in the year ended April 30, 2019. The Corporation has a small amount of oil and gas production revenue, but the currently producing wells are not generating sufficient cash flows to support operations in the long-term. In addition, the Corporation's convertible debentures (note 9) with a face value of \$1,958,000 matured on September 30, 2019. The Corporation does not currently have the resources to pay out these debentures. The Corporation is currently pursuing alternatives to address these concerns including pursuing a previously announced reverse takeover transaction with a private energy company ("**Drakkar**"), as well as entering into dialog with debenture holders to either convert to common shares or extend the maturity date of the convertible debentures. There is no guarantee the Corporation will be successful in these endeavours. During the year, the Corporation and Drakkar announced that they have entered into a non-binding letter of intent dated July 3, 2018 for a proposed transaction between the two companies. The proposed transaction contemplates that the Corporation and Drakkar will enter into a business combination whereby each Drakkar shareholder would receive once common share of the post transaction entity for each one Class A common share of Drakkar. Each common shareholder of the Corporation would receive one common share of the post transaction entity for each 3.25 common shares of Blacksteel which would result in the shareholders of Drakkar controlling the combined entity. The Corporation is still actively pursuing this transaction. These factors indicate a material uncertainty that may cast significant doubt on the ability of the Corporation to continue as a going concern. The accompanying financial statements have been prepared with the assumption that the Corporation will realize its assets and discharge its liabilities in the normal course of business. The Corporation believes it has sufficient cash reserves to continue as a going concern. If the going concern assumption is not appropriate, adjustments may be necessary to the carrying values of assets and liabilities, reported revenues and expenses, and the balance sheet classifications used in the financial statements.

(b) Accounting policies

In preparation of these condensed interim financial statements, Blacksteel used the same accounting policies and methods of computation as in the annual financial statements for the year ended April 30, 2019 except as described in note 2(b). These condensed interim financial statements should be read in conjunction with Blacksteel's annual audited financial statements for the year ended April 30, 2019. The disclosure provided is incremental to that included with the annual financial statements. Certain information and disclosures included in the notes to the

Blacksteel Energy Inc.
Notes to the Condensed Interim Financial Statements
For the three and six months ended October 31, 2019
(Amounts in Canadian dollars)
(Unaudited)

financial statements is condensed or disclosed only on an annual basis.

New standards adopted by the Corporation

i) IFRS 16, "Leases"

The Corporation adopted IFRS 16 Leases ("**IFRS 16**"), which replaces IAS 17 Leases, for its annual period beginning May 1, 2019 using the modified retrospective approach whereby no restatement of comparative periods is required. Under IAS 17, leases of property, plant and equipment were recognized as finance leases when substantially all the risks and rewards of ownership of the underlying assets were transferred. All other leases were classified as operating leases. IFRS 16 requires lessees to recognize right-of-use assets, representing its right to use the underlying asset, and lease liabilities, representing its obligation to make payments. Right-of-use assets are measured at cost, comprised of the initial measurement of the corresponding lease liabilities, lease payments made on or before the commencement date and any initial direct costs. They are subsequently depreciated on a straight-line basis and reduced by impairment losses, if any. Right-of-use assets may also be adjusted to reflect the re-measurement of related lease liabilities. Lease liabilities are initially measured at the present value of the remaining lease payments, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Corporation's incremental borrowing rate. Subsequently, the lease liability is measured at amortized cost using the effective interest rate method and adjusted for interest and lease payments.

On transition, the Corporation did not identify any leases within the scope of IFRS 16 and as such has not recognized any lease liabilities or right-of-use assets. As permitted by IFRS 16, the Corporation elected not to recognize lease liabilities and right-of-use assets for short term leases (lease term of 12 months or less) and leases of low-value assets. There were no onerous lease contracts that would have required an adjustment to the right-of-use assets as at the transition date.

3. Financial instruments and risk management

(a) Fair Values

The fair values of cash, accounts receivable, short term loans receivable, and accounts payable and accrued liabilities approximate their carrying value due to the short term maturity of these instruments. The fair value of long-term loans receivable approximates its carrying value as management believes it currently bears an interest rate reflective of the risk profile of the loans. The fair value of convertible debentures approximates its carrying value as the Corporation believes market discount rates and the Corporation's risk profile have not changed materially since issuance.

IFRS established a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The three levels of the fair value hierarchy are described below:

Level 1: Values based on unadjusted quoted prices in active markets that are accessible at the measurement date for identical assets and liabilities.

Level 2: Values based on quoted prices in markets that are not active or model inputs that are observable either directly or indirectly for substantially the full term of the asset or liability.

Level 3: Values based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement.

When the inputs used to measure fair value fall within different level of the hierarchy, the level within which the fair value measurement is categorized is based on the lowest level input that is significant

Blacksteel Energy Inc.
Notes to the Condensed Interim Financial Statements
For the three and six months ended October 31, 2019
(Amounts in Canadian dollars)
(Unaudited)

to the fair value measure in its entirety.

At October 31, 2019 cash is measured at fair value of \$42,955 (April 30, 2019 - \$29,162) falls under level 1 of the hierarchy.

The fair value of the convertible debentures liability is determined using a level 3 valuation model at recognition. Inputs include interest rates for similar non-convertible debt and consideration of term to maturity.

(b) Risk Management

The Corporation is exposed to financial risks arising from its financial assets and liabilities. The Corporation manages its exposure to financial risks by operating in a manner that minimizes its exposure to the extent practical. The main financial risks affecting the Corporation are credit risk, market risk and liquidity risk.

(i) Credit Risk

Credit risk is the risk of financial loss to the Corporation of a customer or counterparty to a financial instrument failing to meet its contracted obligations.

At October 31, 2019, the maximum exposure to credit risk was \$585,653 (April 30, 2019 - \$595,840) being the carrying value of its cash, accounts receivable and loans receivable.

Cash consist primarily of cash bank balances. The Corporation manages the credit exposure of cash by selecting financial institutions with high credit ratings and monitors all short-term deposits to ensure an adequate return. The Corporation does not invest its excess cash in high risk investment vehicles such as asset backed commercial paper.

There were no receivables allowed for or written off during the period ended October 31, 2019 or the year ended April 30, 2018. The Corporation considers all receivables greater than 90 days to be past due. There were no past due receivables as at October 31, 2019 and April 30, 2019.

The loans receivable are receivable from the Corporation's joint venture partner as part of its working interest acquisition in Girouville oil and gas assets (\$277,000) as well as the Corporation's directors (\$235,000) (note 4). The \$277,000 loan is secured by a claim on a 14% working interest in the Girouville assets. The \$235,000 loan receivable from the directors is deemed collectable as the Corporation also owes the directors \$235,000 under convertible debenture agreements (note 6).

As at October 31, 2019, and April 30, 2018 the Corporation's accounts receivable were comprised of the following:

	October 31, 2019	April 30, 2019
Joint Venture	\$ -	\$ -
Goods and Services Tax	2,461	3,870
Interest	24,100	20,771
Total	\$ 26,561	\$ 24,641

(ii) Market Risk

Market risk is the risk that changes in market prices, such as commodity prices, interest rates and foreign exchange rates will affect the Corporation's net earnings or the value of financial

Blacksteel Energy Inc.
Notes to the Condensed Interim Financial Statements
For the three and six months ended October 31, 2019
(Amounts in Canadian dollars)
(Unaudited)

instruments. The objective of the Corporation is to manage and mitigate market risk exposures within acceptable limits, while maximizing returns. Market risks are as follows:

Commodity Price Risk

Commodity price risk is the risk that future cash flows will fluctuate as a result of changes in commodity prices. Commodity prices for oil and natural gas are impacted by world and continental/regional economic and other events that dictate the levels of supply and demand. Given the Corporation's limited production, the Corporation has chosen not to hedge any of its oil and natural gas production and consequently, the Corporation had no financial derivative sales contracts in place as at or during the period ended October 31, 2019, and year ended April 30, 2019. The Corporation manages this risk by monitoring commodity prices and factoring any changes into operational decisions.

Foreign Currency Exchange Risk

Foreign currency exchange rate risk is the risk that future cash flows will fluctuate as a result of changes in foreign exchange rates. The Corporation is exposed to foreign currency exchange risk as the underlying market prices in Canada for oil and natural gas fluctuate with changes in the exchange rate between the Canadian and United States dollar. As of October 31, 2019, and April 30, 2019, the Corporation did not conduct business transactions in other currencies, had no forward exchange rate contracts in place, and had no working capital items denominated in foreign currencies. The Corporation manages this risk by monitoring foreign currency exchange rates and factoring any changes into operational decisions.

Interest Rate Risk

Interest rate risk is the risk that future cash flows will fluctuate as a result of changes in market interest rates. The Corporation is exposed to interest rate price risk to the extent that its loans receivable and convertible debentures bear interest at fixed rates. The Corporation had no interest rate swaps or financial contracts in place as at or during the period ended October 31, 2019, or year ended April 30, 2019.

(iii) *Liquidity Risk*

Liquidity risk is the risk that the Corporation will not be able to meet its financial obligations as they are due. The Corporation's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when due without incurring unacceptable losses or risking harm to the Corporation's reputation. The Corporation monitors this risk by preparing capital expenditure forecasts which are regularly monitored and updated as considered necessary. As well, the Corporation utilizes authorizations for expenditures on non-operated projects to manage capital expenditures and liquidity.

The Corporation's accounts payable and accrued liabilities are comprised of the following:

	October 31, 2019	April 30, 2019
Trade	\$ 333,448	\$ 292,032
Interest	83,221	13,871
	\$ 416,669	\$ 305,903

The Corporation's convertible debentures matured September 30, 2019. The Corporation is currently pursuing a conversion to common shares with the debenture holders.

Blacksteel Energy Inc.
Notes to the Condensed Interim Financial Statements
For the three and six months ended October 31, 2019
(Amounts in Canadian dollars)
(Unaudited)

(c) Capital Management

The Corporation considers its capital structure to include shareholders' equity and long-term debt, if any. The Corporation's objective when managing capital is to safeguard its ability to continue as a going concern (note 2(a)) so that it can continue to maintain investor confidence and to not expose the Corporation to excess risk.

The Corporation manages its capital structure and makes adjustments to it based upon the level of funds available to support the exploration and development of its petroleum and natural gas properties. The Corporation currently generates minimal cash flow from its operations. As such, the Corporation continues to be dependent on external financing to fund its exploration and development activities, and as necessary, to pay general and administrative and other ongoing costs. To date, external financing has included only issuing common shares, common share purchase warrants and convertible debentures.

The Corporation will pursue additional sources of external financing to ensure that it has necessary financial resources available. To the extent that market conditions are not believed to be positive for raising equity or debt, adjustments may be made to the timing of planned capital expenditures and operating costs reduced to the extent possible until those market conditions become acceptable. Management reviews its capital management approach on an ongoing basis. There were no changes in the Corporation's approach to capital management during the period ended October 31, 2019 or year ended April 30, 2019.

The Corporation's capital consists of shareholders' equity (deficiency) and long-term debt, if any, as follows:

	October 31, 2019	April 30, 2019
Shareholders' deficiency	\$ (1,028,358)	\$ (807,644)
Long-term debt	-	-
Capital	\$ (1,028,358)	\$ (807,644)

The Corporation is not subject to any externally imposed capital requirements.

Blacksteel Energy Inc.
Notes to the Condensed Interim Financial Statements
For the three and six months ended October 31, 2019
(Amounts in Canadian dollars)
(Unaudited)

4. Loans receivable

(a) Directors' Loans

The Corporation loaned, an unrelated private company ("TERIC") \$610,000 during the year ended April 30, 2016 which bore interest at 8.5% per annum which was secured by a general security agreement providing a first charge over all TERIC's assets. This loan was cancelled during the year ended April 30, 2018 when the Corporation entered into an agreement with TERIC and the Corporation's directors. The agreement resulted in the redemption of 1,058,000 common shares of Blacksteel held by TERIC at \$0.125 per share, the transfer of face value \$235,000 of convertible debentures from TERIC to the Corporation's directors, the transfer of \$235,000 of loan receivable from TERIC to the Corporation's directors under similar terms and the elimination of the remaining \$375,000 of TERIC loan receivable, and the related accrued interest which totaled \$75,573 at April 30, 2017. The loan receivable was written down to its expected fair value of \$372,627 at April 30, 2017, based on expected future collectability. Interest receivable of \$75,573 on the TERIC loan was also written off, for a total impairment charge of \$312,946. Based on the Corporation's share value on the date of the cancellation and additional \$5,274 was included in impairment charges on the cancellation date during the year ended April 30, 2018.

(b) Drakkar Loan

In connection with the acquisition of a 30% interest in the Girouxville oil and gas assets, Blacksteel also provided a \$400,000 loan to Drakkar Energy Ltd. ("Drakkar") to assist in the purchase of the remaining 70% interest in the assets. The Loan matured on May 25, 2017, accrues interest at a rate of 12% per annum and is secured by a 20% working interest in the Girouxville assets retained by Drakkar (14% overall working interest). The loan was not repaid at maturity, and is now effectively a demand loan. In the year ended April 30, 2019, \$30,000 (2018 - \$NIL) of the principle balance was repaid. In the period ended October 31, 2019, an additional repayment of \$26,000 (2018 - \$NIL) was received.

(c) Loans Balances

	October 31, 2019
Directors' loans	\$ 235,000
Drakkar loan	251,000
	\$ 486,000

(d) Expected Credit Losses

On transition to IFRS 9, a stage 3 Expected Credit Loss ("ECL") provision of \$93,000 was recorded through retained earnings under the transitional provision of IFRS 9. May 1, 2018, the Corporation performed a comprehensive review of each loan subsequently measured at amortized cost to determine the requirement for an ECL provision.

The changes in expected credit loss provisions are as follows:

	2019	2018
Provision, April 30, 2018	\$ -	\$ -
Transitional adjustment	93,000	-
Revised provision, April 30, 2019	93,000	-

Depletion

Future development costs of \$4,849,000 (2018 - \$5,191,000) associated with the development of the Corporation's proved plus probable reserves were included in the calculation of depletion for the year ended April 30, 2019.

6. Convertible debentures

On September 16, September 30, October 30, and November 30, 2015, the Corporation completed the issuance of convertible unsecured subordinated debentures (the "**Debentures**") for gross proceeds of \$663,000 (\$609,960 net of finder's fees), \$619,000 (\$569,480 net of finder's fees), \$521,000 (\$480,120 net of finder's fees), and \$155,000 (\$142,600 net of finder's fees) respectively, for total gross proceeds of \$1,958,000 (\$1,802,160 net of finder's fees), at a price of \$1,000 per debenture. The Debentures pay interest at a rate of 8.5% per annum, payable in cash on a semi-annual basis on March 31 and September 30, commencing on March 31, 2016. All Debentures mature on September 30, 2019 (the "**Maturity Date**"). Each Debenture is convertible, at the holder's option, into Class A Common Shares at any time prior to the earlier of the business day immediately preceding the Maturity Date and the business day immediately preceding any date fixed for redemption by the Corporation at a conversion price of \$0.25 per Class A Common Share (the "**Conversion Price**"). The Conversion Price shall be subject to standard anti-dilution adjustments. Prior to the Maturity Date, and after September 30, 2017, the Corporation may: (a) redeem the Debentures through payment of the outstanding principal and any accrued and unpaid interest; and/or (b) force the conversion of the Debentures if the 20 day weighted average volume trading

Blacksteel Energy Inc.
Notes to the Condensed Interim Financial Statements
For the three and six months ended October 31, 2019
(Amounts in Canadian dollars)
(Unaudited)

price of the Class A Common Shares is no less than \$0.40.

The Debentures are compound financial instruments and have been classified as debt (net of issuance costs) with the residual value allocated, representing the conversion feature, to shareholders' equity. The fair value of the debt portion of the Debentures was determined by discounting the future cash flows using an interest rate for a similar debt instrument without a conversion feature, estimated to be 18% per annum. The issuance costs will be amortized over the term of the Debentures and the debt portion will accrete to the principle balance at maturity. The accretion of issuance costs and the interest paid are expensed on the statement of loss and comprehensive loss.

Debt component, April 30, 2018	\$ 1,716,061
Accretion of convertible debentures	168,273
Debt component, April 30, 2019	\$ 1,884,334
Accretion of convertible debentures (note 11)	73,666
Debt component, October 31, 2019	\$ 1,958,000
Equity component, April 30, 2018, and 2019, and October 31, 2019	\$ 458,266

7. Decommissioning provisions

The Corporation's decommissioning provisions result from its ownership interest in oil and natural gas assets including well sites and gathering systems. The total decommissioning provision is estimated based on the Corporation's net ownership interest in all wells and facilities, estimated costs to reclaim and abandon these wells and facilities and the estimated timing of the costs to be incurred in future years. The total estimated, inflated undiscounted risked cash flows required to settle the provisions, before considering salvage, is approximately \$462,000 at October 31, 2019 (April 30, 2019 - \$462,000), which has been inflated at 1.63% (April 30, 2019 - 2%) discounted using a weighted average risk-free rate of 2.11% at July 31, 2019 (April 30, 2019 - 2.0%). These obligations are to be settled based on the economic lives of the underlying assets, which currently extend up to 11 years into the future and will be funded from general corporate resources at the time of abandonment.

The following table summarizes changes in the decommissioning provisions for the period ended October 31, 2019 and the year ended April 30, 2019:

	October 31, 2019	April 30, 2019
Decommissioning provisions, beginning of the period	\$ 390,318	\$ 394,960
Accretion (unwinding of discount)	4,160	8,330
Additions (note 5)	-	-
Change in estimate (note 5)	-	(12,972)
Decommissioning provisions, end of period	\$ 394,478	\$ 390,318

8. Share capital

(a) Authorized

Unlimited number of voting Class A and non-voting Class B common shares
 Unlimited number of voting Class C, and non-voting Class D and E preferred shares

(b) Issued common shares

Class A common shares issued and outstanding	Number of shares	Stated Value
Balance, April 30, 2018	35,601,416	\$ 14,937,629
Warrants exercised	626,000	244,954
Balance, April 30, 2019, and October 31, 2019	36,227,416	\$ 15,182,583

9. Stock-based compensation

(a) Stock option plan

The Corporation has established a stock option plan that covers all officers, directors, employees and consultants of the Corporation (the “Plan”). The Plan is administered by the Board of Directors who determines to whom options should be granted, including the terms and the vesting periods of the options. The aggregated number of common shares issuable upon the exercise of all options granted under the Plan shall not exceed 10% of the issued and outstanding common shares of the Corporation at any given time. No one person can receive options within a one-year period entitling the person more than 5% of issued common shares. Under the Plan, stock options have a maximum ten-year term and normally vest over a two-year period and have an exercise price based on the then market price of the Corporation’s shares.

The following options have been awarded under the stock option plan:

	Period ended October 31, 2019		Year ended April 30, 2019	
	Number	Exercise Price	Number	Exercise Price
Outstanding, beginning of period	1,245,000	\$ 0.10	1,245,000	\$ 0.10
Outstanding, end of period	1,245,000	\$ 0.10	1,245,000	\$ 0.10
Exercisable	1,245,000	\$ 0.10	1,245,000	\$ 0.10

The following table summarizes the expiry terms and exercise prices of the Corporation's outstanding stock options as at October 31, 2019:

Date of grant	Date of Expiry	Outstanding Options	Weighted Average Remaining Contractual life (years)	Number of Stock Options Exercisable
August 24, 2012	August 24, 2022	1,245,000	2.9	1,245,000
		1,245,000	2.9	1,245,500

10. General & Administrative (“G&A”) expenses

	Three months ended October 31,		Six months ended October 31,	
	2019	2018	2019	2018
Management consulting services	\$ 5,000	\$ 5,000	\$ 10,000	\$ 13,000
Professional fees	51,195	37,558	53,984	29,558
Shareholders services	7,140	5,277	12,049	6,250
Other	70	-	98	4,233
Total	\$ 63,405	\$ 47,835	\$ 76,131	\$ 53,041

11. Finance expense

	Three months ended October 31,		Six months ended October 31,	
	2019	2018	2019	2018
Interest on convertible debentures	\$ 27,740	\$ 41,607	\$ 69,350	\$ 83,214
Accretion on convertible debentures	29,466	38,207	73,665	76,414
Accretion of decommissioning provision	2,080	1,974	4,160	3,948
Total	\$ 59,286	\$ 81,788	\$ 147,175	\$ 163,576

12. Loss per share

	Three months ended October 31,		Six months ended October 31,	
Outstanding Weighted Average Common Shares	2019	2018	2019	2018
Basic	36,227,416	36,227,416	36,227,416	36,176,383
Diluted	36,227,416	36,227,416	36,227,416	36,176,383

No stock options, convertible debentures, share purchase warrants or broker warrants have been included in the calculation of diluted shares outstanding as their inclusion would be anti-dilutive.

13. Related party transactions

During the three and six months ended October 31, 2019, the Corporation incurred a total of \$5,000 and \$10,000 respectively (2018 - \$5,000 and \$13,000 respectively) related to management services, to a private corporation of which an officer of the Corporation is an owner. These costs were recorded to general and administrative expenses. As at October 31, 2019, \$33,000 (April 30, 2019 - \$23,000) owing to this private corporation was included in accounts payable.

During the three and six months ended October 31, 2019, the Corporation incurred a total of \$7,745 and \$10,535 respectively (2018 – \$29,380 and \$40,893 respectively) related to legal services to a law firm in which a director of the Corporation is a partner. These costs were recorded to general and administrative expenses. As at October 31, 2019, \$42,376 (April 30, 2019 - \$20,037) owing to this law firm was included in accounts payable.

Blacksteel Energy Inc.
Notes to the Condensed Interim Financial Statements
For the three and six months ended October 31, 2019
(Amounts in Canadian dollars)
(Unaudited)

During the three and six months ended October 31, 2019, the Corporation earned \$4,994 and \$9,988 respectively (2018 - \$4,994 and \$9,988 respectively) of interest income on loans receivable from directors totalling \$235,000 (note 4) of which \$9,988 (April 30, 2019 - \$13,316) was in accounts receivable at October 31, 2019.

During the three and six months ended October 31, 2019, the Corporation incurred \$4,994 and \$9,988 respectively (2018 - \$4,994 and \$9,988 respectively) of cash interest expense and \$5,049 and \$10,098 respectively (2018 - \$5,049 and \$10,098 respectively) of non-cash accretion expense on convertible debentures held by directors (note 6) of which \$9,988 (April 30, 2019 - \$1,665) remained in accounts payable and accrued liabilities at October 31, 2019.
